

Office Use Only	

To be submitted with the structural design forming part of an application for a construction certificate.

This form must be attached with the submission of the structural documentation required for the determination of a construction certificate or combined development application and construction certificate submission.

This form is essential as it provides evidence to the certifying authority determining the construction certificate that the structural design has been prepared or verified by a structural engineer as defined by Council's Geotechnical DCP, and that the structural design has been prepared in accordance with the recommendations given in the geotechnical report for the same development. This form is also essential to establish that the recommendations given in the geotechnical report have been interpreted and incorporated into the structural design as originally intended by the geotechnical engineer in preparing the geotechnical report.
