

Environmental Division

CERTIFICATE OF ANALYSIS

Work Order Page : 1 of 4 : EW1201188

Client : Environmental Division NSW South Coast : WOLLONGONG CITY COUNCIL Laboratory

: MR WAYDE PETERSON Contact Contact : Glenn Davies

Address Address : 41 BURELLI STREET : 99 Kenny Street, Wollongong 2500

> **WOLLONGONG NSW, AUSTRALIA 2500** Unit 4 / 13 Geary Place, PO Box 3105, North Nowra 2541

> > AUSTRALIA

: glenn.davies@alsglobal.com E-mail : wpeterson@wollongong.nsw.gov.au E-mail

Telephone : +61 02 4227 7111 Telephone : 02 4225 3125 Facsimile : +61 02 4227 7277 Facsimile : 02 4225 3128

QC Level Proiect : Whytes Gully Stormwater Overflow : NEPM 1999 Schedule B(3) and ALS QCS3 requirement

Order number

C-O-C number **Date Samples Received** : 19-APR-2012

Issue Date Sampler : Glenn Davies · 02-MAY-2012

Site

No. of samples received : 1 : WL/001/11 Whytes Gully Stormwater No. of samples analysed Quote number : 1

This report supersedes any previous report(s) with this reference. Results apply to the sample(s) as submitted. All pages of this report have been checked and approved for release.

This Certificate of Analysis contains the following information:

- General Comments
- Analytical Results

NATA Accredited Laboratory 825

Accredited for compliance with ISO/IEC 17025.

Signatories

This document has been electronically signed by the authorized signatories indicated below. Electronic signing has been carried out in compliance with procedures specified in 21 CFR Part 11.

Signatories	Position	Accreditation Category
Ankit Joshi Glenn Davies	Inorganic Chemist Environmental Services Representative	Sydney Inorganics Laboratory - Wollongong
Raymond Commodor	Instrument Chemist	Sydney Inorganics
Sarah Millington	Senior Inorganic Chemist	Sydney Inorganics

Address 99 Kenny Street, Wollongong 2500

Work Order : EW1201188

Client : WOLLONGONG CITY COUNCIL
Project : Whytes Gully Stormwater Overflow

General Comments

The analytical procedures used by the Environmental Division have been developed from established internationally recognized procedures such as those published by the USEPA, APHA, AS and NEPM. In house developed procedures are employed in the absence of documented standards or by client request.

Where moisture determination has been performed, results are reported on a dry weight basis.

Where a reported less than (<) result is higher than the LOR, this may be due to primary sample extract/digestate dilution and/or insufficient sample for analysis.

Where the LOR of a reported result differs from standard LOR, this may be due to high moisture content, insufficient sample (reduced weight employed) or matrix interference.

When sampling time information is not provided by the client, sampling dates are shown without a time component. In these instances, the time component has been assumed by the laboratory for processing purposes.

Key: CAS Number = CAS registry number from database maintained by Chemical Abstracts Services. The Chemical Abstracts Service is a division of the American Chemical Society.

LOR = Limit of reporting

^ = This result is computed from individual analyte detections at or above the level of reporting

• ED-093T:LCS recovery for Potassium falls outside ALS Dynamic Control Limit. However, it is within the acceptance criteria based on ALS DQO. No further action is required.
