8/11/2012	1	Erosion of sand dunes at Sharkey's Beach, Coledale	Further to last month's query, is a formal process of assessment going to happen? Can NF2 please have some clarification? Does Council have any knowledge of what happened to the landcare grant that was awarded to this area?	Environmental Strategy Planning	<p>Assessment of new infrastructure is undertaken by the Infrastructure Division and you would need to contact them as to progress. As the beach is a non patrolled beach installation of fencing would be a low priority and as detailed in the previous comment it would require public engagement and unlikely to be supported by residents.</p> <p>With regard to the grant for environmental works the contractors and Bushcare volunteers have been working for a numbers of years undertaking weed control and installation of native plants from the southern end of Sharkey's beach around the coast to Little Austi beach as per the vegetation management plan that has been prepared for the site.</p>
8/11/2012	2	Road repairs, Cater Street, Coledale	NF2 request that a section of road in upper Cater Street, opposite the water facility, is remediated. A trench was previously dug up, filled and bitumined but is now sinking creating a dangerous depression. Can Council please rectify?	City Works	The trenching was carried out by Sydney Water contractors. Council has contacted Sydney Water and they will arrange for appropriate remediation work to be carried out in the near future.
