WOLLONGONG NSW, AUSTRALIA 2500

Date Samples Received : 07-FEB-2013 Issue Date : 15-FEB-2013

No. of samples received : 1

Quote number : WL/001/11 Helensburgh Pony Club No. of samples analysed : 1

This report supersedes any previous report(s) with this reference. Results apply to the sample(s) as submitted. All pages of this report have been checked and approved for release.

This Certificate of Analysis contains the following information:

- General Comments
- Analytical Results

NATA Accredited Laboratory 825

Accredited for compliance with ISO/IEC 17025.

Signatories

This document has been electronically signed by the authorized signatories indicated below. Electronic signing has been carried out in compliance with procedures specified in 21 CFR Part 11.

| Signatories | Position | Accreditation Category | | |
|-------------------|---------------------------------------|-------------------------|--|--|
| Ankit Joshi | Inorganic Chemist | Sydney Inorganics | | |
| Glenn Davies | Environmental Services Representative | Laboratory - Wollongong | | |
| Hoa Nguyen | Senior Inorganic Chemist | Sydney Inorganics | | |
| Nikki Stepniewski | Senior Inorganic Instrument Chemist | Melbourne Inorganics | | |
| Tony De Souza | Senior Microbiologist | Sydney Microbiology | | |

Address 99 Kenny Street, Wollongong 2500

Client : WOLLONGONG CITY COUNCIL
Project : Helensburgh Pony Club Quarterly

General Comments

The analytical procedures used by the Environmental Division have been developed from established internationally recognized procedures such as those published by the USEPA, APHA, AS and NEPM. In house developed procedures are employed in the absence of documented standards or by client request.

Where moisture determination has been performed, results are reported on a dry weight basis.

Where a reported less than (<) result is higher than the LOR, this may be due to primary sample extract/digestate dilution and/or insufficient sample for analysis.

Where the LOR of a reported result differs from standard LOR, this may be due to high moisture content, insufficient sample (reduced weight employed) or matrix interference.

When sampling time information is not provided by the client, sampling dates are shown without a time component. In these instances, the time component has been assumed by the laboratory for processing purposes.

Key: CAS Number = CAS registry number from database maintained by Chemical Abstracts Services. The Chemical Abstracts Service is a division of the American Chemical Society.

LOR = Limit of reporting

^ = This result is computed from individual analyte detections at or above the level of reporting

• MW006 is ALS's internal code and is equivalent to AS4276.7.
