

CERTIFICATE OF ANALYSIS

Work Order	EW2002045	Page	: 1 of 2		
Client	: WOLLONGONG CITY COUNCIL	Laboratory	Environmental Division NS	SW South Coast	
Contact	: DELLA KUTZNER	Contact	: Glenn Davies		
Address	: 41 BURELLI STREET	Address	: 1/19 Ralph Black Dr, North Wollongong 2500		
	WOLLONGONG NSW, AUSTRALIA 2500		4/13 Geary PI, North Nowra 2541 Australia NSW Australia		
Telephone	: +61 02 4227 7111	Telephone	: 02 42253125		
Project	: Whytes Gully PM10 and TSP	Date Samples Received	: 24-Apr-2020 11:37	AMUUL.	
Order number	: 1011047	Date Analysis Commenced	04-May-2020		
C-O-C number	:	Issue Date	05-May-2020 15:58		
Sampler	:			Hac-MRA	NATA
Site	: Monthy HVAS & Dust				
Quote number	: WO/005/18 TENDER			and an and a start of the start	Accreditation No. 825
No. of samples received	: 4			Accred	ited for compliance with
No. of samples analysed	: 4				ISO/IEC 17025 - Testing

This report supersedes any previous report(s) with this reference. Results apply to the sample(s) as submitted. This document shall not be reproduced, except in full.

This Certificate of Analysis contains the following information:

- General Comments
- Analytical Results

Additional information pertinent to this report will be found in the following separate attachments: Quality Control Report, QA/QC Compliance Assessment to assist with Quality Review and Sample Receipt Notification.

Signatories

This document has been electronically signed by the authorized signatories below. Electronic signing is carried out in compliance with procedures specified in 21 CFR Part 11.

Signatories	Position	Accreditation Category
Zoran Grozdanovski	Laboratory Operator	Newcastle - Inorganics, Mayfield West, NSW

General Comments

The analytical procedures used by ALS have been developed from established internationally recognised procedures such as those published by the USEPA, APHA, AS and NEPM. In house developed procedures are fully validated and are often at the client request.

Where moisture determination has been performed, results are reported on a dry weight basis.

Where a reported less than (<) result is higher than the LOR, this may be due to primary sample extract/digestate dilution and/or insufficient sample for analysis.

Where the LOR of a reported result differs from standard LOR, this may be due to high moisture content, insufficient sample (reduced weight employed) or matrix interference.

When sampling time information is not provided by the client, sampling dates are shown without a time component. In these instances, the time component has been assumed by the laboratory for processing purposes.

Where a result is required to meet compliance limits the associated uncertainty must be considered. Refer to the ALS Contact for details.

Key: CAS Number = CAS registry number from database maintained by Chemical Abstracts Services. The Chemical Abstracts Service is a division of the American Chemical Society.

LOR = Limit of reporting

^ = This result is computed from individual analyte detections at or above the level of reporting

ø = ALS is not NATA accredited for these tests.

~ = Indicates an estimated value.

• Analytical work for this work order will be conducted at ALS Newcastle.

• NATA accreditation is not held for results reported in µg/m³. Air volume data was provided by the client.

Analytical Results

Sub-Matrix: FILTER (Matrix: AIR)		Clie	ent sample ID	Glengarry Cottage PM10 9676260	Glengarry Cottage TSP 9676259	Landfill PM10 9778844	Landfill TSP 9676261
