## Revenue Policy, Fees and Charges 2017-2018

### RATES

IPART has set a 1.5% increase to Council's General Income for the rating period of 2017-2018. As Council has had a General Revaluation in July 2016 the below rates have been calculated using the relative change method where the increase in rates for each category has been determined by the relative change in land values.

Although Council's total rates income has increased by 1.5%, individual assessments will vary depending on the change in land value in relation to the average change in land value across the rating base.

The table below is based on the current rating structure and rateable properties as at 30 June 2017.

Rating Category	Name of sub-category	Number of Properties	Ad Valorem Rate	\$ Base (B)/ Minimum (M)	Notional Income Yield
Residential		76,833.97	0.248725	724.81(B)	111,380,225
Farmland		121.00	0.188532	934.60(M)	306,061
Business	Ordinary	278.00	0.321037		46,116
Business	Commercial	2,095.59	1.518155	934.60(M)	19,697,827
Business	3c Regional Business	274.48	2.029569	836.87(M)	6,269,005
Business	Light Industrial	984.96	1.188155	934.60(M)	5,976,286
Business	Heavy Industrial	357.00	1.910011	934.60(M)	6,488,542
Business	Heavy 1 Activity 1	39.00	2.767851	836.87(M)	7,906,005
Mining		15.00	2.696875	934.60(M)	906,508
Special Rates	Wollongong Mall Rate	73.00	0.788481		1,082,111
Special Rates	City Centre Rate	658.36	0.076866		413,200
					<b>160,471,885</b>

In accordance with Section 514 of the Local Government Act 1993, each parcel of land within the City has been categorised for rating purposes and owners are notified in conjunction with their annual rate notice or where varied during the period at that time in writing.

Under Section 554 of the Local Government Act 1993, all land is rateable unless it is exempt from rating. Sections 555 and 556 of the Local Government Act define the categories under which a parcel of land must fall in order to be eligible for exemption from rating. Ratepayers that are eligible under these sections may apply to Council for exemption from rating. Council's website has further information and guidance on rates exemptions for entities to assist in determining whether they may have claim for exemption.

The following comments are made in respect of each ordinary rate to be levied by Council:

#### Residential

Section 516 as it relates to Wollongong City Council states that land is to be categorised as 'residential' if it is a parcel of rateable land valued as one assessment and:

- i Its dominant use is for residential accommodation, or
- ii In the case of vacant land, is zoned or otherwise designated for use for residential purposes under an environmental planning instrument, or

Council has determined that 50% of its residential rate income will be levied as a base amount.

# Revenue Policy, Fees and Charges 2017-2018

## Farmland Rating

Section 515(1) sets out the prerequisites for occupied land to be categorised as 'farmland'. Land will be categorised as farmland if it is a parcel of rateable land valued as one assessment and it must be:

- i The dominant use of which it is for farming (that is, the business or industry as it is defined within the Act) which:
- ii has a significant and substantial commercial purpose or character; and
- iii is engaged in for the purpose of profit on a continuous or repetitive basis (whether or not a profit is actually made).

## Mining

Section 517(1) states that land is to be categorised as mining if it is a parcel of rateable land valued as one assessment and it is the dominant use of a coal mine or metalliferous mine.

## Business

Section 518 of the Act states that land is to be categorised as 'business' if it cannot be categorised as farmland, residential, or mining. Under Section 529(1) Council has determined that there will be six sub-categories of the 'business' category as follows:

- Business – Ordinary
- Business – Commercial
- Business – 3 (c) Regional
- Business – Light Industrial
- Business – Heavy Industrial
- Business – Heavy 1 Activity 1

## Special rates

### Wollongong Mall Special Rate

The rate will be levied on business properties to provide Council with revenue sufficient to defray the expenses in connection with the management, promotion, working, maintenance, cleaning and provision of additional works and services for the Wollongong Mall and its environs.

### City Centre Special Rate

The rate will be levied on business properties to provide Council with revenue sufficient to defray the expenses in connection with crime prevention and community safety strategies in the city centre.

## Categorisation Maps

Maps showing property categorisation and sub-categorisation and special rate are available for perusal at Council's Administration Building, Burelli Street, Wollongong, which identify lands mentioned in this Rating Policy.

## Interest Charge for Overdue Rates and Charges

In accordance with Section 566 (3) of the Local Government Act 1993, the interest rate applicable to overdue rates and charges will be 7.5 % per annum simple interest calculated and applied on a daily basis.

The interest rate will be shown on the 2017-2018 Rates and Charges Notice.

# Revenue Policy, Fees and Charges 2017-2018

## REVALUATION

A general valuation of land within council areas usually occurs every three years. These valuations are the basis of the rates notices issued by Council. Valuations are a major factor used in determining landowners' level of rates. Council has received new valuations as at 1 July 2016 and these revised values have been used to assess the 2017-2018 rates.

Council's total rate income is pegged by the State Government who determines the percentage Council is able to increase its total rate income over the previous year. Variations in land value through the revaluation process have no effect on the total rate income of Council. Individual assessments, however, will vary depending on the change in land value in relation to the average change in land value within a rate category. Effectively, if the value of an individual parcel of land has increased by more than the average increase across the Local Government Area, the rates will increase. If the property value increase is lower than average, the rates will decrease. As there is a significant spread in valuation changes individual properties could vary substantially in rates applied.

## HARDSHIP

Council recognises that due to exceptional circumstances ratepayers may at times encounter difficulty paying their annual rates and charges. Council has a Debt Recovery and Hardship Assistance Policy that provides a framework for providing relief to any ratepayers who are suffering genuine financial hardship.

## PENSIONER RATES

Council will accept an application for a pensioner concession rebate on the prescribed application form with confirmation of Centrelink/Department of Veteran Affairs (DVA) entitlement. This could be in the form of a plastic blue Pensioner Concession Card (PCC), electronic card on smart phone or similar device, or a confirmation letter which will need to be sighted by the Customer Service Officer.

The pension concession will only be granted for the current rating year. The amount of the rebate will be proportioned according to the number of full quarters in the rating year after the commencement of pensioner eligibility.

The eligible pensioner must:

- Be the owner, or spouse of the owner, and reside at the property
- Hold either a Pensioner Concession Card (PCC) or;
- Gold card embossed with 'TPI' (Totally Permanently Incapacitated) or;
- Gold card embossed with 'EDA' (Extreme Disablement Adjustment)

A mandatory rebate under Section 575 of the Local Government Act (LGA) will be applied to all eligible pensioners. A voluntary Council rebate will apply to eligible pensioners who received the mandatory and voluntary Council rebate under Section 582 of the LGA prior to 1 January 1994. The voluntary rebate of rates will be indexed annually by the same percentage increase in the rates. The voluntary rebate for 2017-2018 will be \$248.47.

Council will verify the concessional eligibility on a regular basis. If eligibility is not confirmed the rebate will be reversed based on the number of full quarters remaining for the year. A letter will be forwarded to the ratepayer advising the rebate has been removed from the account.

If the land is jointly owned by others that are not the spouse of the eligible pensioner, the rebate will be apportioned based on the percentage of the ownership for the eligible pensioner residing at the location.

## Revenue Policy, Fees and Charges 2017-2018

### **LATE PAYMENT FEE – SUNDRY DEBTORS**

Under Council's Debt Recovery and Hardship Assistance Policy, Council can charge a late payment fee on any sundry debtor account that is greater than 60 days.

The late payment fee for 2017-2018 will be \$10.00. This fee will be added to the sundry debtor account at the time a reminder letter is processed.

### **ANNUAL CHARGES**

Council provides a range of services for which it charges an annual charge, authorised under various sections of the Local Government Act 1993, summarised as follows:

#### **Stormwater Management Annual Charges**

In accordance with Section 496A of the Local Government Act, 1993, Council will levy a stormwater management charge on all parcels of rateable land within the urban area of the City of Wollongong categorised for rating purposes as 'Residential' or 'Business' (including all sub categories), not being vacant land, or Land owned by the Crown, or Land held under a lease for private purposes granted under the Housing Act 2001 or The Aboriginal Housing Act 1998.

For the 2017-2018 rating year the following charges will apply:

- Land categorised as residential (not being a strata lot) \$25.00. (Estimated Yield \$1,371,375).
- Residential strata lot \$12.50. (Estimated Yield \$198,513)
- Land categorised as business (not being a business strata lot) \$25.00 per 350 sq metres or part capped at a maximum of \$100.00. (Estimated Yield \$196,850)
- Business strata lot \$25.00 per 350 sq metres or part of the area of land upon which the lot exists capped at a maximum of \$100.00 and divided by the number of business strata lots on that area of land. (Estimated Yield \$11,970)

The total estimated yield for 2017-2018 for the Stormwater Management charge is \$1,778,708

#### **Stormwater Management Service**

The Wollongong Local Government area is prone to high intensity rainfall which can lead to flash flooding. The quantity of runoff during periods of high intensity rainfall is large and only small proportions of the total flow are carried within both the stormwater networks and creek channels. As a result, floodplain inundation is substantial, often fast flowing and at considerable depths. During these periods of high intensity rainfall, flooding is generally characterised by rapid rises and falls in water level.

Sustainable management of stormwater is also crucial to the functioning of the City's natural assets and the management of stormwater flows is critical to the safety of the people of Wollongong. Accordingly, there is an urgent need to address water quality and water quantity (volumes and flow rates) issues throughout the City.

To protect our residents, infrastructure and our natural assets, Wollongong City Council is addressing the important role water quality and quantity plays in the management of our City's social, economic and natural environment through the Stormwater Management Service Charge. This charge assists in funding the improvements and maintenance of the stormwater drainage system in the City.

The Stormwater Charge enables Council to continue to implement the strategies identified in the Stormwater Management and Floodplain Management Plans that have been prepared and periodically reviewed for Wollongong catchments. The total cost of implementing all the strategies in these plans exceeds \$80m.

## Revenue Policy, Fees and Charges 2017-2018

If Council does not undertake or implement the required actions to service the stormwater infrastructure, there will be a decrease in the service life of these assets. This will have a negative effect on Council's budget as the cost to maintain these Stormwater Quality and Quantity assets will increase with time. Costs to rehabilitate stormwater infrastructure will be higher resulting in higher maintenance costs, an increase in the rate of degradation of Council's assets and lower service levels being provided to the community. Utilising lifecycle analysis, it is imperative to implement a sustainable mechanism to ensure that the infrastructure is improved, maintained and repaired to protect human life, property and the environment.

Every member of this community will benefit from this Stormwater Management Service Charge through the preservation and improvement of our infrastructure that affects the way we live and ultimately our environment. It will allow Council to tackle critical Stormwater Management tasks that have been identified to significantly benefit both present and future generations.

Council will utilise the Stormwater Management Service Charge to deliver increased services (new or additional stormwater management services) in the management of stormwater including:

- planning, construction and maintenance of drainage systems, including pipes, channels, retarding basins and waterways receiving urban stormwater;
- planning, construction and maintenance of stormwater treatment measures, including gross pollutant traps and constructed wetlands;
- planning, construction and maintenance of stormwater harvesting and reuse projects;
- planning and undertaking of community and industry stormwater pollution education campaigns;
- inspection of commercial and industrial premises for stormwater pollution prevention;
- cleaning up of stormwater pollution incidents (charge can fund a proportion);
- water quality and aquatic ecosystem health monitoring of waterways, to assess the effectiveness of stormwater pollution controls (charge can fund a proportion); and
- monitoring of flows in drains and creeks, to assess the effectiveness for flow management (flooding) controls (charge can fund a proportion)

The Stormwater Management Service Charge enables Council to deliver the much needed program of stormwater management activities. Projects are in the vital areas of Stormwater Quantity Management and Stormwater Quality Management.

Examples of some of the high priority works in the Stormwater Management Service Charge include:

### **Stormwater Quantity Management**

Large sections of Wollongong are flood risk affected and have a history of flooding, an example of which is the August 1998 flood. This illustrates the need for an integrated long term solution. In response, Council is systematically investigating the risks of flooding, with the aim of developing mitigating strategies. This is dealt with through the Floodplain Management program.

Floodplain Management can cover a range of activities. Options for achieving a reduction in potential flood damage within a catchment include the design and construction of flood mitigation works; policy and planning control review and voluntary purchase of properties.

### **Stormwater Quality Management**

Many issues relating to continued environmental degradation are either directly or indirectly related to water and stormwater quality. In response, three Stormwater Management Plans have been prepared by Council as part of the State Government's initiative for managing stormwater.

Council has carried out significant investigation in the development of our Stormwater Management Plans. These Management Plans have indicated a reduction in water quality through sedimentation,

## Revenue Policy, Fees and Charges 2017-2018

nutrients and pathogens. The result is a degradation of aquatic habitat, reduction in stream fish and invertebrate populations.

Solutions identified in the Stormwater Management Plans include the installation of Stormwater Quality Improvement Devices (SQID's) at a number of locations and innovative water treatment techniques of both on-line and off-line wetland schemes to reduce harmful nutrient loads on Lake Illawarra and other estuaries.

### Stormwater Management Service Charge Project Program

The table below provides details of how additional projects, listed by theme, are to be funded by the Stormwater Management Service Charge.

Project Theme	2016/17 \$'000	2017/18 \$'000	2018/19 \$'000	2019/20 \$'000	2020/21 \$'000	2021/22 \$'000

### Domestic Waste Management Services Annual Charges

In accordance with Section 496(1), Section 496(2) and Section 541 of the Local Government Act 1993, Council will levy an annual charge for the provision of domestic waste management services. The Domestic Waste Management Charge varies depending on the size of the general waste container provided for domestic waste management during 2017-2018. A minimum of one Domestic Waste Management Service/Charge is to be levied for each separate dwelling upon a property whether or not the dwellings are subdivided. A separate dwelling for the purpose of this policy is defined as being self-contained and/or leased on the open market.

The following options are available to property owners:

- Weekly service of an 80 litre general waste bin, or
- Weekly service of a 120 litre general waste bin, or
- Weekly service of a 240 litre general waste bin.

In addition to the weekly collection of general waste, each Domestic Waste Management Charge applied to rates entitles residents to a fortnightly recycling and a fortnightly garden organics collection service, collected on alternate weeks, and two on-call household clean up services each financial year.

Property owners are able to decrease the size of their general waste bin throughout the year. New charges are applied, pro rata, to their rates account from the date of delivery.

Property owners may also nominate to increase their bin size, an administration fee of \$63.00 is applicable. Where a property owner did not nominate a change in bin size for 2017-2018 the Domestic Waste Management Charge will automatically be levied for the bin size charged in 2016/17. The standard charge for a 120 litre general waste bin will apply if the residential property is part of a complex that already receives a bulk waste service and the owner does not use individual bins for each unit or flat.

## Revenue Policy, Fees and Charges 2017-2018

The charges for 2017-2018 have increased by an average of 1.5% compared to 2016-2017 and include \$32K that has been applied from amounts held as restricted cash from prior periods and are used over time to facilitate pricing equalisation.

The charges for the provision of the total service during the year commencing 1 July 2017 will be:

	General Waste Bin Size	Annual Charge \$	Estimated Yield \$
Occupied land	80 litres	308	6,324,656
Occupied land	120 litres	405	22,495,454
Occupied land	240 litres	667	4,150,500
Households with Kidney Dialysis	240 litres	405	
Vacant Land - Waste Charge		31	44,338

In determining the amount to be charged, Council has calculated its cost per annum under the following headings:

<b>Domestic Waste Management Cost 2017-18</b>		\$'000
<b>Waste Facility Costs</b>		
Waste disposal costs		15,474
Capital Contribution		489
<b>Collection Costs</b>		
Collections & Processing Contracts		15,612
Education & Promotion		464
Operational & Administration costs		702
Total Direct Costs		<b>16,777</b>
Pricing equalisation		(32)
<b>Statutory Charges</b>		
Pensioner Rebate		1,016
<b>TOTAL EXPENDITURE</b>		<b>33,725</b>
Pensioner subsidy		(488)
Other Revenue		(222)
<b>TOTAL INCOME</b>		<b>(710)</b>
<b>Total Domestic Waste Management Cost</b>		<b>33,015</b>

It is estimated that a total of 82,300 serviced properties and 1,400 parcels of vacant land with service availability to be charged during 2017-2018. In determining the charge to be applied to serviced properties, all the costs listed above have been taken into account.

Council cannot apply income from ordinary rates towards the cost of providing Domestic Waste Management Services. In determining the annual Domestic Waste Management Charge, Council must include all expenditure that relates to the delivery of this service and may include provision for future increases to allow for equalisation of pricing from year to year. This is considered a prudent

## Revenue Policy, Fees and Charges 2017-2018

approach as the waste area is subject to changing industry regulation and costs and operational requirements that have the potential for significant variations in the future.

### Domestic Waste Management Services – Additional Services

Additional waste and recycling collection services are available to domestic properties and are priced as follows:

Additional Services		
Service Type	Bin Size	Annual charge
Green Waste	240 litres	76
Recycling	240 litres	49
General Waste	80 litres	189
	120 litres	254
	240 litres	407

Additional general waste collection services can only be purchased where a household is currently receiving the 240 litre weekly service. A maximum of two additional service types can be purchased at the charges listed above in conjunction with an existing service. Where additional bins across all service types are required, these will be charged at the appropriate annual Domestic Waste Management Charge.

### Domestic Waste Management Services – Wheel Out - Wheel Back Service

Residents can apply for the 'Wheel Out – Wheel Back' service to assist with having their bins placed out for collection and returned to their property each week at an annual fee of \$270. Property Owners must complete an application form for this service and will be required to provide supporting evidence such as a medical certificate. Once authorised by Council, the cost for this service will be applied to the rates account for the property. Residents will need to provide written consent for the Collection Contractor to access their property and indemnify the Collection Contractor and Council against all claims.

### Waste Management Services – Subdivisions, New Developments and Multi Unit Dwellings (MUDs)

Where a domestic property has been subdivided or newly developed, Council is required to levy a Domestic Waste Management Charge. When this occurs, a 120 litre charge will be levied on a pro rata basis unless otherwise notified by the property owner. For vacant land a charge of \$31 will be levied from date of registration on a pro rata basis.

### Waste Management Services – Bin Rationalisations in Multi Unit Dwellings (MUDs) and Complexes

Where a multi-unit complex has restricted capacity to store waste and recycling receptacles, Council may issue a bulk waste bin or larger Mobile Garbage Bins (MGBs) to equal a waste disposal capacity for each unit within the complex of 80, 120 or 240 litres. Where a bin rationalisation is implemented, all property owners will be levied the same domestic Waste Management Charge. It is up to each individual owner/complex to present the bins for collection at a designated collection point.

## Revenue Policy, Fees and Charges 2017-2018

For complexes wishing to reduce the number of bins at their property, Council will require minutes from a Strata Meeting demonstrating that the application of a standard Domestic Waste Management Charge across all units has been adopted by a quorum.

### Waste Management Services – Non Domestic Premises

In accordance with section 501 of the Local Government Act 1993, Council will levy an annual charge for the provision of waste management services to non-domestic properties. 'Waste' means garbage, being all refuse other than trade waste and effluent as defined in the Local Government Act, 1993 dictionary.

The Non Domestic Waste Management Charge varies depending on the size of the general waste container provided for waste management during 2017-2018.

The following options are available to property owners:

- Weekly service of an 80 litre general waste bin, or
- Weekly service of a 120 litre general waste bin, or
- Weekly service of a 240 litre general waste bin.

In addition to the weekly collection of general waste, each Non Domestic Waste Management Charge entitles the property with a fortnightly recycling and green waste collection service, collected on alternate weeks. Additional bins will not be provided to non domestic properties and where the standard services are insufficient; these premises should seek the services from a licensed waste reduction and disposal service provider. Non domestic premises are not entitled to the on-call household clean up service.

The charges for the provision of the total service during the year commencing 1 July 2017 will be:

	General Waste Bin Size	Annual Charge \$	Estimated Yield \$
Non Domestic (includes land exempt from rating)	80 litres	308	25,302
Non Domestic (includes land exempt from rating)	120 litres	405	34,828
Non Domestic (includes land exempt from rating)	240 litres	667	110,697

In determining the amount to be charged, Council has calculated its cost per annum under the following headings:

## Revenue Policy, Fees and Charges 2017-2018

<b>Waste Management Services Non Domestic Cost 2017-18</b>	
	\$'000
<b>Waste Facility Costs</b>	
Waste disposal costs	81
Capital Contribution	3
	83
<b>Collection Costs</b>	
Collections & Processing Contracts	82
Education & Promotion	2
Operational & Administration costs	4
Total Direct Costs	88
<b>TOTAL COST</b>	171
<b>Total Proceeds</b>	171

It is estimated that these charges will be applicable to a total of 330 properties during 2017-2018.

### Waste Management Services - Disputed Domestic Waste Management Charges

The annual rate notice that is issued each year in July includes details of the Domestic Waste Management charge attributed to each property, including any additional bins or services. Where the property owner believes they are being incorrectly charged and advises Council prior to the due date for payment of the first instalment, Council will verify the rate and bin size and the charge will be amended back to 1 July for the current financial year.

Where a property owner advises Council of an anomaly in regards to the size of their general waste bin subsequent to the first instalment due date, then the charge will be amended from the date that advice was received by Council.

Residents must pay their rates instalment as issued, and any amendments agreed to will be adjusted on the next instalment notice.

### Exemptions

Under the Local Government Act 1993, Council is required to make and levy an annual charge for the provision of domestic waste management services. Pensioners receive subsidies to this charge, no other exemptions apply.

# Revenue Policy, Fees and Charges 2017-2018

## FEES & OTHER CHARGES

In accordance with Section 608 of the Local Government Act 1993, Council proposes a range of fees as scheduled in this document.

Generally, these fees are intended to cover the following:

- supply of a service, product or commodity,
- giving information,
- providing a service in connection with the Council's regulatory functions, including receiving an application for approval, granting an approval, making an inspection and issuing a certificate,
- allowing admission to any building or enclosure.

The income received from these fees and charges will reduce the level of cross subsidisation, inherent in service provision, from general rates.

Section 610 of the Local Government Act states that a fee should not be determined if it is inconsistent with the amount determined under another Act, or is in addition to the amount determined under another Act.

The Local Government Act 1993 provides the framework for setting fees. Proposed increases to fees and other charges have generally increased in line with the estimated CPI increase for 2017-2018 of 2.5%. Some prices vary outside the index based on specific issues impacting the operations, costs, or pricing parameters of the particular service. Regulatory or statutory fees will increase in line with government pronouncements.

Fees have been set and proposed for various activities after giving due consideration to the Local Government Act and the following factors:

- The cost to Council of providing the service.
- The importance of the service to the community.
- The price fixed by the relevant industry body.
- Any factors specified in the Local Government regulations.
- Market rates/pricing.

All Rates, Fees & Charges are set at the maximum and can be adjusted in accordance with this Revenue Policy which allows for a discount, exemption or waiver of fees to be given where specifically included in the schedule of Rates, Fees and Charges or provided for under a Council Policy. The criteria for the application of the discount, exemption or waiver must be clearly defined in the schedule of Rates, Fees and Charges or stand alone policy. A list of these policies is provided in the Appendix to the schedule of Rates, Fees & Charges. Discounts, exemptions or a waiver of fees outside these delegations can only be approved by the General Manager. Requests granted by the General Manager outside of the policy are entered into a register and reported to the Corporate Governance Committee at regular intervals.

The following pricing categories have been used in determining the fees, which are summarised below:

- Full Cost Pricing - Fees are set to enable the recovery of all direct and indirect costs involved in the provision of a service.
- Subsidised Pricing - Fees and charges are set at a level that recovers less than the full cost incurred in service delivery. In effect, some level of subsidisation is factored into the price.
- Rate of Return Pricing - Fees and charges are set to enable the recovery of all direct and indirect costs involved in the provision of a service plus a profit margin.

## Revenue Policy, Fees and Charges 2017-2018

- Market Pricing - Fees and charges are based on current market fee structures. The market price is usually determined by examining competitors' prices and may have little relationship to the cost of providing the service.
- Statutory Pricing - Fees and charges are set to comply with statutory legislation.
- Rate of Return/Market Pricing – Fees that are a combination of Rate of Return & Market Pricing and relate to Waste Services.

Goods and Services Tax (GST) has been included in the fees and charges on those items that are subject to GST. Some fees and charges are GST free under Division 38 and some are exempt from GST under Division 81 of the GST legislation.

In general, those fees and charges that are of a regulatory nature are exempt from GST, whereas those that constitute a fee for service or competitive supply will be subject to GST.

Council has identified its Category 1 and Category 2 Business Activities for the purpose of competitive neutrality. Category 1 businesses have a gross turnover greater than \$2m, they are;

- Tourist Parks
- Leisure Centres
- Waste Disposal
- Crematorium and Cemeteries.

Council has no Category 2 businesses identified that have a gross turnover of less than \$2m. National Competition Policy requires disclosure of the pricing methods Council used in determining the fees and charges of these declared business activities. The pricing methods that Council used in determining these fees and charges are detailed in the declared business activities section.

In accordance with *Pricing and Costing for Council Businesses – A Guide to Competitive Neutrality*, a document published by the Department of Local Government, Wollongong City Council has declared that the following are to be considered as business activities and these business activities have income earned from fees and charges:

### Tourist Parks

The Tourist Parks' function is concerned with the operation, management and development of caravan parks (tourist parks) at Bulli, Corrimal and Windang to achieve the best available financial return and the provision of a high standard amenity to park patrons and local residents. Key activities for this function include:

- Operation of the Tourist Parks
- Maintenance of Tourist Park Grounds, Buildings and surrounds
- Marketing
- Provision of Additional Facilities and Accommodation types

The pricing method used in determining Tourist Parks' Fees and Charges is the **market** pricing method whereby fees and charges are based on current market fee structures. The market price is usually determined by examining competitors' prices and may have little relationship to the cost of providing the service. It is anticipated that it will not be necessary for Council to subsidise this business activity.

### Waste Disposal

The Waste Disposal function manages the disposal of solid waste generated within the City. This function works closely with the waste collection and recycling function to ensure waste is disposed of in a manner which best utilises limited landfill resources. The key activities of this function are:

- Landfill management

## Revenue Policy, Fees and Charges 2017-2018

- Environmental control
- Rehabilitation of closed landfill sites.

The pricing method used in determining Waste Disposal Fees and Charges is the **rate of return/Market** pricing method. This is where fees are set to enable the recovery of all direct and indirect costs involved in the provision of a service plus a profit margin taking into account market factors. It is anticipated that it will not be necessary for Council to subsidise this business activity.

### Health & Fitness

This function is responsible for the management and upkeep of Council's leisure centres. The key activity of this function is:

- Management of the commercial leisure centres.

The pricing methods used in determining Health & Fitness Fees and Charges are the **market, full, statutory** and **subsidised** pricing methods. Market price is based on current market fee structures and is usually determined by examining competitors' prices and may have little relationship to the cost of providing the service. Full cost pricing is where fees are set to enable the recovery of all direct and indirect costs involved in the provision of a service. Statutory pricing is where fees are set to comply with statutory legislation. Subsidised pricing is where fees are set at a level that recovers less than the full cost incurred in service delivery. In effect some level of subsidisation is factored into the price.

It is anticipated that Council will be subsidising this business activity due to the service being provided on a less than cost recovery basis.

### Crematorium and Cemeteries

The crematorium and cemeteries function is concerned with the provision of quality crematorium, cemetery and memorial facilities and services to the residents of Illawarra and surrounding areas, including the Sydney Metropolitan region. Key activities for this function include:

- Garden Placements and Development
- Grave Preparation
- Operating the Cemeteries and the Crematorium.

The pricing methods used in determining Cemeteries and Crematorium's Fees and Charges are a combination of the **market** and **full cost** pricing methods. Market price is based on current market fee structures and is usually determined by examining competitors' prices and may have little relationship to the cost of providing the service. Full cost pricing is where fees are set to enable the recovery of all direct and indirect costs involved in the provision of a service.

It is anticipated that Council will be subsidising this business activity due to the service being provided on a less than cost recovery basis.

## CHARGES FOR WORKS CARRIED OUT ON PRIVATE LAND

Council's policy in relation to charges for works on private land arises from two different types of activities.

- 1 Where work is carried out on private property by Council labour utilising materials purchased by Council, the work is charged at full cost recovery including all administrative overheads.
- 2 For works requiring the clearing of land or of such other regulatory nature, Council has a policy of employing private contractors to perform the work. Council adds to the contractor's charges an amount to cover the cost of overseeing the adequacy of the work performed. This amount will be \$150.00 (including GST) during the 2017-2018 financial year.

<b>SPECIAL NOTES:</b>			
Commercial or business waste not accepted as household waste, as assessed by Weighbridge Operator(s)			
Garden Organics are not accepted to landfill and must be separated from mixed general waste and be free of contamination for depositing in the garden organics drop off area			
Approved Charities who have been granted Section 88 Levy exemption by the Environment Protection Authority are exempt from disposal fees for unusable goods and materials recovered from public donations received at the charities local facilities. Charities are not exempt from garden organics & wood waste; commercial and business waste or waste from outside the Wollongong Local Government Area. Charities who have been granted Section 88 Levy exemption by the Environment Protection Authority and who deliver material that does not comply with Councils Wollongong Waste and Resource Recovery Park – Fees and Exemptions Policy will incur the 'Non-conforming Charity Waste' charge. Charities that do not have an EPA Section 88 Exemption will incur full commercial waste disposal rates.			
Specified items are required to be deposited in recycling areas prior to mixed general waste being deposited for disposal. Failure of site users to follow directions may result in specified item(s) weights being included in mixed general waste charges			
Wollongong Waste and Resource Recovery Park is not permitted to accept builders waste for landfill disposal including mixed soils, concrete, bricks, tiles, plasterboard, wood waste and general mixed builders waste.			
Asbestos material and commercial amounts of polystyrene not accepted at Wollongong Waste and Resource Recovery Park			
The Product Stewardship Act, 2011 effective 1 July 2012 provides for televisions, computers and computer peripherals to be accepted for recycling by an 'Approved Arrangement' free of charge, providing the material presented meets industry standards			
Pensioner Exemptions apply in accordance with the Wollongong Waste and Resource Recovery Park - Fees and Exemption Policy
